

2 Drum Poly Spill Pallet – Nestable

SKU# 5222-YE

This next generation design was built on the success of the original Poly-Spillpallet 2000, improving upon many of the great features users have experienced for years. The newest iteration provides containment, while the textured, removable grate provides a secure surface for drums to sit on. These pallets also link together to form a cohesive, unobtrusive containment area when multiple units are required.

- Fully nestable design saves on freight and takes up less warehouse space
- Drain option
- Optional tarp to prevent rainwater intrusion
- Durable plastic design will not rust or corrode
- US Patent No. 10,065,765

Technical Data		
	U.S.	Metric
Dimensions	51" L x 25.75" W x 21.5" H	130 x 66 x 53 cm
Unit Weight	53.5 lbs	24.5 kg
Spill Capacity	66 gal	249.8 L
Load Capacity	2000 lbs	907 kg
Absorption Capacity	N/A	N/A
Material	100% Polyethylene	
Regulations	EPA 40 CFR 264.175, SPCC, UFC and NPDES	

Options & Accessories	
w/ Drain	5222-YE-D
